Compare the Difference

SEPTIC TANK FEATURES	 POLYMASTER	VS  OTHER POLY	VS  CONCRETE
Pre-assembled fittings and baffle	✓	✗	✓
10 minute hook-up time	✓	✗	✗
Lightweight	✓	✓	✗
Transport to site on a standard ute with drop sides and lift into position with a small excavator	✓	✓	✗
Only small installation machinery required. Suits limited access sites	✓	✓	✗
No expensive crane required	✓	✓	✗
Extremely tough and durable design, can withstand knocks and bumps during installation	✓	✗	✗
Small diameter riser = much easier to fit	✓	✗	✗
500kg load-rated manhole cover with tamper-proof bolts. Easy to seal against water ingress	✓	✗	✗
Unique design, self-anchored - no concrete required	✓	✗	✓
Low profile tanks = easier to install in rocky & higher water table conditions	✓	✗	✗

DETAIL B OUTLET

“ Not all suppliers are the same and I want to compliment your company on the level of service we have received. From the price supplied...and follow up phone call from customer service, your offer of help and warranty advice was welcomed. I just want to commend you on your great customer service. Thank you. ”

- Sarah, Strathfieldsaye
